# MIRKO MELFI – IT Analyst

---

I am an organized and meticulous person, always eager to learn. I manage myself pretty well not only working independently, but also in teams. Currently, I am in the fifth year of my IT Engineering degree, having successfully completed over 85% of the subjects and achieved the Intermediate Degree of IT Analyst as a result (which is currently in process).

In my leisure time, I seek to enhance my skills by learning new technologies and deepening my knowledge of those I already know. Additionally, I continue to study English with the goal of reaching a C2 proficiency level.

---
